Project Basic Information

This is a single page web project, and I use lazyload to change the page content. When clicking a menu item, it calls a function to check the current url and get related page content. This is a pure js+css+html project. I did not use any database in this project. So this project is very easy to run on a server.
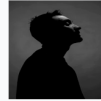

Core Technologies

- jQuery
- Bootstrap
- Anime.js
- JavaScript lazy load

Detail

- This website is compatible with all major browsers.

- This website uses responsive design, which will make it easier to browse the website on computers, tablets and mobile phones.

- This website uses jQuery to load header and footer.

- This website uses jQuery to dynamically load page contents.

- This website uses Bootstrap as the main CSS framework.

- This website uses Anime.js to home page my brief text.

- This website uses css animation to change the color of the logo in the footer.

Home Page

My Brief

Working Experience

Freelance UI Designer

Responsible for the art design, creative work and production of the software interface. According to the user groups of various related software, propose innovative and highly attractive creative designs.

Game developer

When I was in college, I got the idea to make my own game. In addition to programming, planning, and art, I need to work as product manager, project manager, creative director and copywriter, business development, and marketing.

Project Page

Projects

These are two websites I have made before, one is an forum website and the other is a information display website. Both parts of the website design and code are done by me independently.

Forum Projects

Forum Projects Details
This is a forum site for Chinese near Niagara Falls

Home Projects Skills Interests About Me

Skill Page

Skills

I have strong skills in three areas, photography, graphic design and programming.

Skills Details

Graphic Design

I used to be a graphic designer in China and worked in graphic design for about a year. I have strong skills in Photoshop, Illustrator and InDesign.

Photography

I just came to Canada and got a job taking pictures for a magazine. This job requires me to work one day a week. The photos I took at the time will be posted on the flyers and websites.

Programming

I started learning programming after coming to Canada for a while and then got a programming related job. This job requires me to spend a lot of time making a website.

Interests Page

Personal interests

I have many hobbies and three of them are photography, comics and 3D printing.

3D Print
I bought a 3D printer last year and now print 3D objects every week.

Photographic
I take over 10,000 photos every year, most of them landscapes.

Comic book
Reading comic book has been my hobby since I was a child and I have been reading comic book for over 20 years now.

About Page

About Me

I was born in China and immigrated to Canada 10 years ago. I have strong skills in three areas, photography, graphic design and programming. I have many hobbies and three of them are photography, comics and 3D printing.

About Me Details

About Me 1

I love to drive to various places in Ontario to take pictures especially in the summer when there are many parks. I love to travel and I love to travel to places that are beautiful and interesting.

About Me 2

I walk for an hour a day. Even in winter I walk for an hour outside. There are many discoveries while walking. Sometimes I see some rare animals. Once I rescued an Asian woman who was attacked by a man.
